Hi Jeff,

The weekend was good. I hope you had a good weekend too.

CAA 105 grants require mid-year and end-of-year progress reports due no later than 30 calendar days after the end of the 2nd Federal fiscal quarter (April 30) and the 4th Federal fiscal quarter (October 31). For this project, annual reporting will be sufficient. The report should include status of the project including any accomplishments to date, and reasons for slippage or cost overruns, if applicable.

Thank you for checking.

- Angie

Subject: federal grant

Angela,

I hope had a nice weekend. I have a follow-up question from our meeting Friday. I was wondering if federal grants require some sort of final report. We were thinking of hiring somebody simply to collect the data, and to bring the analysis in house. So they really wouldn't be much for the contractor to report on. But I assume we would be obligated to put together some sort of final report? And would that need to be submitted by the deadline? Thank you, Jeff
